Board Image Capture Camera & Glassboard

# Real Collaboration, Real Time

Glassboards and Whiteboards are an excellent tool for collaboration, however hybrid meetings can make for a challenging experience. With Aria Connect, collaboration no longer requires everyone to be in the same room. Our whiteboard image capture camera paired with Aria Glassboard provides a real time view of information being shared whether you are in the room or remote.

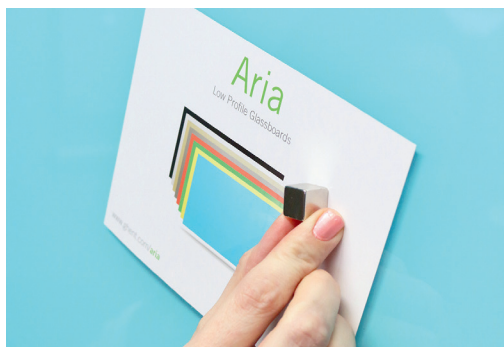

## Integrated

No apps or downloads required. Access whiteboard content online in real time on any device through a browser-based interface.

## Collaborate

The glassboard camera focuses, brightens, and saves all written content. Share written content to anyone with internet access.

## Functional

Offered in two different sizes: 4'H x 6'W and 4'H x 8'W. Can be purchased with a non-magnetic or magnetic glass writing surface.

## Aesthetic

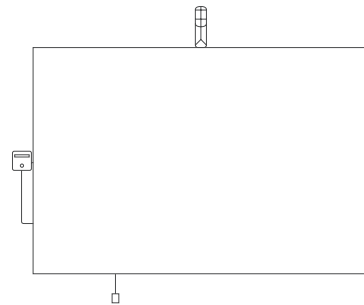

Constructed with 1/4" thick tempered low-iron glass, it floats just 1/2" off the wall when installed.
